Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

EAF Part 1: F. Additional Information

This action by the Adirondack Park Agency (Agency) is to submit to the Governor, in consultation with the Department of Environmental Conservation, a proposal to amend the Adirondack Park State Land Master Plan (APSLMP) to classify two tracts of state land in the Town of Newcomb, Essex County, located on the west and east sides of the Tahawus Road (County Route 25). This action is part of a larger classification package to be submitted to the Governor which includes 97 other proposals for classification of state lands, all of which were determined to be Type II actions. Also, the Agency is proposing classification of the Boreas Ponds Tract, located to the east of these tracts, which was a Type 1 action under the State Environmental Quality Review Act (SEQRA). A Draft Supplemental Environmental Impact Statement for the Boreas Ponds Tract classification was accepted by the Agency in October 2016.

The MacIntyre West tract is comprised of 7,368.1 acres, and 7,365 acres are proposed to be classified as Wilderness to be added to the High Peaks Wilderness. The remaining 3.1 acres are subject to a right-of-way and are proposed for classification as Primitive to be added to a new area called the MacIntyre Primitive Area. A map showing the proposed classification with summary information is attached as ES-16.

The other tract is MacIntyre East (6,059.55 acres), which is proposed for classification as Wilderness, Primitive and Wild Forest. If approved, classification of MacIntyre East will add 4,446.55 acres of Wilderness to the High Peaks Wilderness, 1,604.74 acres of Wild Forest to the Vanderwhacker Mountain Wild Forest and 8.26 acres to the newly-created MacIntyre Primitive Area. A map showing the proposed classification with summary information is attached as ES-17.

The Agency's Final Programmatic EIS: Guidelines for Amending the APSLMP (1979) identifies any classification of over 5,000 acres of a new acquisition as Wilderness as a Type I action under SEQRA. Therefore, the proposed classification of MacIntyre East and MacIntyre West is a Type I action and a draft Negative Declaration was issued for the proposed classification on November 16, 2016. Pursuant to the APSLMP, the Agency conducted public hearings on the larger package of classification and reclassification proposals both inside and outside the Adirondack Park, and solicited and considered comments on all proposals.

One potential adverse impact is the possibility of public motorized uses in the area proposed to be classified as Wild Forest. Currently, both the MacIntyre East and MacIntyre West tracts are unclassified state lands, which the APSLMP requires to be managed as Wilderness. This prohibits public motorized uses on these two tracts pending classification. The proposed classification of 1,604.74 acres south of Tahawus in the MacIntyre East Tract as Wild Forest could conceivably open up the area to motorized uses. The associated impacts, however, can be mitigated through the unit

management planning process, as the APSLMP requires that Unit Management Plans include "management objectives for the protection and rehabilitation of the area's resources and ecosystems and for public use of the area consistent with its carrying capacity" and will address "actions to minimize adverse impacts on the resources of the area." APSLMP at 11.

The existence of the wetlands in the area proposed for Wild Forest classification will also serve to mitigate impacts from potential public motorized uses on these lands, because of the protections afforded by the Freshwater Wetlands Act, Article 24 of the Environmental Conservation Law. Any activity involving or impairing wetlands is regulated and requires a permit under the Agency's Freshwater Wetlands Act regulations [9 NYCRR Part 578]. This includes, but is not limited to, any trails, roads or bridges that require filling of wetlands.

The Opalescent River flows through the MacIntyre East tract into the Hudson River in the area to be classified as Wild Forest, and is designated a Wild River under the Wild, Scenic and Recreational Rivers System Act (WSRRSA) [ECL § 2713(1)(e)]. The river area extends one-half mile from the banks of the river [ECL § 15-2703(9)]. The APSLMP requires that Wild River areas be managed in accordance with the guidelines for Wilderness areas, which prohibit public motorized uses. APSLMP at 50. Therefore, the lands within one-half mile of the Opalescent River area will be managed as wilderness.

Lastly, the lands proposed for Wild Forest classification are Forest Preserve under the New York State Constitution, Article XIV. Although Article XIV has not been held to prohibit public motorized uses, it does state that Forest Preserve lands should be "forever kept as wild forest lands. They shall not be leased, sold or exchanged, or be taken by any corporation, public or private, nor shall the timber thereon be sold, removed or destroyed."

Any adverse impacts from the potential for motorized use in the Wild Forest portion of the MacIntyre East tract will be mitigated by the protections provided by the unit management planning process, the Freshwater Wetlands Act, the WSRRSA and Article XIV. Therefore, these impacts will not be significant.

The MacIntyre West tract abuts the High Peaks Wilderness. It is proposed to be classified as Wilderness and added to that unit. There is a retained 1,935 foot long, 50 foot wide ROW mapped as Boulder Alley Road which loops through a southern portion of this tract. This ROW will be classified as Primitive and added to a new area named the MacIntyre Primitive Area.

Sections of the MacIntyre East tract abut the High Peaks Wilderness tract. A northern section of the tract is proposed to be classified as Wilderness and added to that unit. There is a ROW which runs through that portion of the tract which will need to be classified as a Primitive Area. South of LeClaire Brook is proposed to be classified as Wild Forest and added to the Vanderwhacker Mountain Wild Forest.

Staff considered an alternative which involved classifying sections of the tract south of LeClaire Brook as Wilderness or Primitive to emphasize the significant wetlands. Staff determined that this area does not provide a sense of remoteness or degree of wildness associated with these classification categories due to the proximity of County Route 25, the Saratoga & North Creek Railway and uses of nearby private lands, including those classified as Industrial Use.

Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project : Classification- MacInlyre East and West
 Date : February __, 2018

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Adirondack Park Agency as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

EAF Part 3: Reasons Supporting This Determination

One impact identified in Part 2 of this FEAF is the impact on local communities if visitor demand for emergency medical and police services rise with increased visitation and use of the state lands, both Wilderness and Wild Forest.

The classification recommendation could result in a substantial change in the use, or intensity of use, of land including open space or recreational resources, or in its capacity to support existing uses, inasmuch as the Wilderness classification could attract more hikers to the region, and the Wild Forest classification could result in more opportunities for mechanized and motorized recreation. See 6 NYCRR 617.7(c)(viii). The classification recommendation could encourage or attract a large number of people to a place or places for more than a few days, compared to the number of people who would come to such place absent the action. See 6 NYCRR 617.7(c)(ix). The impact of this classification recommendation, if approved, could result in an increased demand for trails and access to state lands in this portion of Essex County. As a result, there could be an increased demand for lodging and restaurants and other visitor services, and for emergency services.

However, there are already existing state Forest preserve lands in the surrounding vicinity, which attract hikers, snowmobilers, bicyclists, hunters and other visitors. There are also extensive conservation easements allowing for public recreational uses in the area, particularly snowmobiling, and several town parks. Given the existing public lands and recreational use in the area, it is not anticipated that the impact from the classification of these lands on community services will be a significant adverse impact.

As described in EAF Part 1: "F. Additional Information," most of MacIntyre West and MacIntyre East tracts will be classified as wilderness, and 1,604.74 acres of the MacIntyre East tract will be classified as Wild Forest. There were several reasons supporting the decision to classify the southern portion of the MacIntyre East tract lands as Wild Forest. Although there are significant wetlands in this area, the area lacks the sense of remoteness or degree of wildness associated with a wilderness classification. There is a county road adjacent to the proposed Wild Forest section of the tract, and an easement for rail transportation purposes running south from Tahawus through this section. The railroad easement is not currently being used for rail transportation, but the tracks are still in place and the easement is privately owned. In addition, the private lands directly north of this section are classified as Industrial Use lands. The location of the railroad easement and county road lessens the sense of wildness experienced in this limited area. Moreover, as explained in the Attachment to EAF Part 1: "F. Additional Information," the sensitive waters and lands on this portion of the MacIntyre East Tract are otherwise protected by the unit management planning process, the

APSLMP Guidelines, the Freshwater Wetlands Act, the WSRRSA, and Article XIV of the New York State Constitution.
