**DESCRIPTION OF THE PROJECT:** Proposed timber harvest on a 643 acre portion of a 4,656 acre parcel. Two silvicultural treatments are proposed: 1) A shelterwood overstory removal, with reserves, designed to release an established understory of softwood and hardwood seedlings and saplings, and; 2) Single tree and group selection harvest to capture value in select mature trees, and create small openings to release existing regeneration and promote new growth. The property is subject to a New York State Working Forest Conservation Easement, as well as Forest Stewardship Council and Sustainable Forestry Initiative certifications.

**RECOMMENDATION:** Approve with conditions
