RE: Regulatory Programs – updated permit formats

As discussed during the Agency's meeting of June 13, 2019, the Agency has begun to issue permits containing only a summary of the proposal, project site, Agency jurisdiction, any conditions necessary for approval, and the relevant conclusions of law. The supporting facts and analysis previously included in permits are now contained in supplemental documents maintained in Agency files and available to the public upon request.

The documents associated with the two draft permits being reviewed by the Agency during its September meeting are included for reference as part of the mailing materials.
