For permits that will not include conditions related to Building Color, Vegetation Removal, or Plantings

Explain why no condition is needed: **NA**

Additional Site / Project-Specific Concerns / Conditions Needed

A: Condition restricting timing of treatment to mid-May/June of treatment year

B: Application must be within the treatment locations proposed, and in accordance with DEC Pesticides Permit

C: Compliance with “Clean Drain Dry” standards for all equipment to be used in the application

D: Conduct post treatment concentration monitoring as described in the Sampling Plan.

E: Conduct post treatment aquatic plant survey between August 1 and September 15 of the treatment year, repeating the survey methodology of the pre-treatment survey.

F: Post treatment status report to be provided to the Agency by December 1 of the treatment year, to include post treatment residue monitoring report and post treatment aquatic plant survey results

Justification:

A: Target plants will be controlled early in the growing season will be smaller than they are later in the season. This will result resulting in reduced decaying biomass and associated water quality impacts

B: Dosage control is pursuant to DEC permit; Application in areas other than those depicted on the map may have associated impacts that haven't been reviewed, or may involve underwater lands under different ownerships

C: Clean Drain Dry standards will limit potential for spread of invasive plant material from other waterbodies

D: Post treatment residue monitoring will allow confirmation that the project was undertaken as authorized

E: Post Treatment aquatic plant survey will allow confirmation that the project was undertaken as authorized, will provide data to assess efficacy of the treatment, and will provide assessment of non-target impacts
